

STILTS SAFETY TRAINING April 3rd, 2012

Yes!! You are reading this correctly! As of January 1, 2010 stilts are now legal in Ontario construction, with limitations and conditions.

BuildSafe - Construction Safety Services Inc. is one of the few companies that have trainers who have been trained by the CSAO to deliver the Ministry of Labour recognized and preferred, stilts safety training program.

Section 116 (as amended by O. reg. 443/09) allows stilts for residential units and residential common areas, only under certain conditions; 1- drywall finish work, 2 - installation of insulation and 3- vapor barrier installation

Also under the new regulations it is mandatory for all stilts users to be trained. If you or your workers are using stilts, training is needed asap before you get charged by the MOL.

Training consists of 3 parts;

- The rules, including an overview of OHS responsibilities and regulations for stilts;
- The workplace must meet certain conditions; and
- Workers must demonstrate the ability to inspect, maintain, adjust, fit, safely mount, maintain balance and walk on their stilts.

Drywall and insulation companies can call to arrange a training class for your management and workers at your location, or you can attend one of our open door classes.

BuildSafe supplies all materials needed. (workbooks, notepads, pencils etc..) **** Workers must bring their own stilts.** Employers must supply the training room and enough tables and chairs for all participants.

- A plasticized training card will be given as proof of attendance along with a record of training.
- Price: \$150.00 + HST per participant. - If you have 8 or more participants call for pricing.
- Training will be held at the **CAMBRIDGE HOLIDAY INN** Tuesday, April 3rd, 2012 @ 8am – 3pm

Registration Information: **Complete and Fax to 519-220-0650** (If more space is required, please put names on a separate sheet)
